The Performance Challenge

How have your investments performed over the last five years? We challenge you to calculate your year-to-year returns from July 1 through June 30 of each year and add your line to the graph below.

If you can verify that your stock portfolio beat our average client's managed portfolio (ACMP), or that your real estate rental properties beat our SELECT INVESTORS FUND, LLC (SIF), we will award you \$500 cash for your efforts!*

If it turns out you didn't win the \$500, you can win much more - get into our investment program to increase your return by thousands of dollars!

* - We must verify; INVESCO stock portfolios or SIF may not be included; real estate returns must include a reasonable deduction for your time involved; you must be on our mailing list.
